Complete Energy Saving Solutions

FMC Technologies provides advanced building systems that reduce building operating expenses, increase productivity and provide a safe, comfortable working environment. We deliver complete turnkey solutions to control: heating, ventilating and air conditioning (HVAC), energy consumption, building lighting, indoor air quality, metering and security. FMC provides board room to boiler room solutions and service for new construction, renovations and system upgrades.

Building Automation Systems

- Energy Management Systems
- Direct Digital Control Systems
- Indoor air quality
- Lighting control systems
- Multiple vendor integration
- Building dashboards
- System optimization
- Custom programming
- Web interfaces

Security

- Access control
- Video surveillance

Energy Services

- Energy benchmarking
- Energy audits
- Metering
- Utility incentives
- Retro-commissioning

Services/Support

- System design
- Installation, commissioning, training
- Remote monitoring and diagnostic capabilities
- Preventative maintenance service agreements
